Thank you for your email. I hope this was reported to ORS< PSC< DHEC as every complaint counts\ . This company will soon be requesting another rate increase and we need to keep the pressure on them to connect the sewer to the city pipes and send it to Rock Hill Treatment Plant then demolish the sewer treatment plants on our golf course; all at their expense. Thank you so much for your continued support and let us know if this crops up again as is normal with this company's bandaids repairs.

Linda Stevenson

Tega Cay Water Citizen Advisory Council: *As Tega Cay residents, we come together for a more powerful voice to demand efficient, higher-quality waste water and water service under TCWS with less offensive aesthetics, odors and environmental impact. In doing so, we benefit all of Tega Cay's health and safety, quality of life and property values.*

Water Problems again, We Discovered a small burst water pipe about 6 inch's before the meter on the water works side. Tuesday August 20th We were not sure when it accoured as we are having new Electrical piping installed throughout the street, small noise could not be heard during the day due to the loud noise being made by the electrical compressor working the wire into the ground, we discovered the broken water pipe on Tuesday evening, called the water people who came and said they would have to wait until Thursday to get the back hoe to dig up the drive way area to work on the problem, work was 60% completed , now we wait for the stones to settle and the people will come next Monday August 25 to put in and resurface the area with black top.

Hopefully there will be NO Water damage caused by the damaged water pipe the leaked out over 4 days going under my drive way?

Regards Stewart Gamble
